

TURNKEY MULTI-ASSET
PRIME BROKERAGE
SOLUTIONS

JFD
BROKERS

JFD Group of companies offers multi-asset prime brokerage solutions which reduce trading costs, increase trading volumes and improve revenue margins.

WHY JFD

Regulated in the EU to provide institutional brokerage and B2B services, JFD delivers the highest level of compliance, security and technological prowess. We have exceptional expertise covering trade execution services, market making and designated sponsoring.

Our prime brokerage services are suitable for brokers, proprietary trading firms, hedge funds and corporations. Service & connection can be tailored to suit different business models and setup requirements. We combine market data and execution access across several trading venues to provide a unique one provider experience for your diverse needs.

The multi-asset nature of our solutions provides you with multiple cross-selling opportunities for greater client retention and lifetime value.

In addition to a wide variety of CFD instruments, we also enable you to offer exchange-traded (physical) instruments such as cash equities. Their simplicity, popularity and lack of major regulatory restrictions opens the door for easier market penetration across a wider range of jurisdictions, allowing you to effectively promote your brand, increase sales conversions and improve the ROI of your client acquisition campaigns.
